Gold Sponsor

Opening Keynote

The Northwest Oracle Users Group (NWOUg) serves the Pacific Northwest community who use Oracle Corporation products. Our goal is to provide education, facilitate networking and technical resources, and relay Oracle Corporation's strategy and direction to application and database users.

Benefits

Education

NWOUg provides a variety of opportunities to learn about current and upcoming Oracle technologies. Please continue to visit the News and Events pages to learn about upcoming NWOUg/Oracle sponsored lunch-and-learns, conferences, and other educational events, as well as training, conferences, and events offered by Oracle Corporation and other Oracle user groups.

Networking

NWOUg offers networking opportunities through the trainings and events we sponsor; we also encourage online interaction through our Forums available to our members. Join in discussions related to Oracle products, strategic direction, and staffing or post your own discussion topic to obtain the benefit of the collective knowledge and experience of the NWOUg community.

Media

NWOUg gathers and stores presentation and papers from our events throughout the year. Stay abreast of the latest Oracle happenings from these events! Members have access to the Documents page where these Oracle related articles and presentations can be viewed and downloaded.

Members Only

The members-only section of the NWOUg website includes discussion forums, job listings, classified ads, technical documents, articles and presentations. Moreover, NWOUg members often receive discounts on training, event and conference registrations.

Community

Join us on the Social Network forums : LinkedIn, Facebook and Twitter #nwoug16 for all conference updates.

Opening Keynote

IoT, BigData,
Artificial Intelligence -
Opportunities & Challenges

Mayur Ranoliya
Service Delivery Director
Ericsson, USA

Mayur is a visionary technologist working in the wireless industry for 15 years. He has spent most of his career enabling 2G, 3G, 4G and now 5G technologies across several countries.
